

Dear friends and colleagues,

We send you great greetings and support from Serbia and Alliance for life, regional association that cooperates with Serbian state organs, local authorities, gathers a large number of non-governmental organizations, has got a support from a business entities, and covers a lot of geographical areas.

This year we had a two big international demographic conferences, with “One of us” taking important participation and contribution, where we talked about abortions being one of the main reasons all nations in Europe are dying, meaning having more people dead than babies being born per year. If this doesn't change our continent will soon lose its: identity, culture, ethnic richness and religion. First small nations will disappear, then middle ones and then large ones.

We have a lot to learn from each other in Europe, having in mind our differences and deep traditions. We have the same problem, we have same interests, we should cooperate and work together - if not in all fields, but in a lot of them for sure. For the benefit of each of us, for the benefit of all of us. For every born and unborn baby in Europe and the world. Life is stronger than death.

Without Christianity Europe is demographically dying. In order to survive, and for the good of our children we should bring back Christianity, which established European culture and states, in the high and honorable place it deserves.

It would be easier to count stars in the sky than to count gifts and blessings from Lord to each person and nation. But, we are often ungrateful. Lord did not leave us, we left him.

(today we can shout:)

Christ(os) ante portas! (but also:)

Antichrist ante portas!

To whom will we open our gates and our hearts? There is not enough space in one city and in one hearts for two kings.

We wish you much success and health in your noble and important work.

Alliance for life, Serbia

Secretary, Radoyko Ljubichich
